COVID-19 Statement

APICDA has been following the COVID-19 pandemic closely and has been implementing the recommendations from state and federal officials to reduce the public health threat and ensure the health and safety of our employees and stakeholders. To that end, we've closed our offices as of noon on March 17th and our employees are working from home for the immediate future. As our priority remains the continuity of our operations and programs and the fulfillment of our mission, we will continue to be productive and accessible through phone calls and emails. Our phones will be forwarded throughout this unprecedented situation and email correspondence will be answered promptly. Please email info@apicda.com if you need to reach us. We remain hopeful that all of our collective proactive responses to the pandemic will lessen its impact.
